Dear Ms. Wardley,

Thank you for your enquiry regarding our work related to assessing the socio-economic impacts of caribou range planning in Alberta. Alberta Environment and Parks (AEP) is in the process of developing draft range plans and we have supported this work by conducting some preliminary energy and forestry analysis. As per direction from AEP, we will undertake our fulsome analysis once these draft plans have been completed. This will include collecting community specific data and consultation with affected stakeholders, as you note in your letter. I very much appreciate your willingness to support our work and will contact the North West Species at Risk Committee when we are in a position to undertake the fulsome analysis of a draft range plan.

Please feel free to contact me at any time for an update on our progress.

Best Regards,

Pearce Shewchuk
Principal
